Tools

Tattletale vs. Installed Systems

Portable

BETTER DESIGN THAN EXPOSED WIRES

- Just unplug it and move it anytime
- Tamperproof

UNBEATABLE

- Instant cell-burst technology: no phone line to cut
- Rattlesnake® - sensor trips the alarm if moved
- Instant signal. Less than a second

NO WIRING

- 2000' range, high powered wireless sensors

IMMEDIATE PROTECTION 24/7

- No Installation
- Just plug it in

WIRELESS OUTDOOR PROTECTION

- Place a motion detector or the LOOP® on gang boxes and storage trailers
- Use the LOOP® to tie up anything, anywhere, anytime
- Use outdoor motion detectors
- Use indoor motion detectors

No waiting, no wires, no hassle.

Installed Systems

- Hard wired and tied to structures
- Cut the phone line and defeat the alarm and monitoring capability
- Costly Wiring. 300ft Range indoor sensors (garage door opener)
- Schedule an appointment and wait for days to get a time window
- Limited protection (structures, trailer, etc)
- Wait for installation, long-term contracts

Testimonials

“...I have become good at the use of the units to deter theft and vandalism at our remote job sites. The sites where we have them installed, although attempted break-ins have taken place, none to date have been successful.”

Douglas Goss, Safety Director
Capriati Construction, Las Vegas, NV

“...We now have a weapon to fight with. I’m treated very well by your company and your people who represent Tattletale.”

Scotty DuPriest, Safety & Risk Manager
John F. Otto, Inc., Sacramento, CA

“...I like the fact that we can set them up when we first arrive at a jobsite. We use a deep cycle 12 volt battery check to see if the unit picks up a cell tower and we are ready to go.”

Charlie Haener, Safety Director
Ford Construction, Lodi, CA
